Route Recommendations

Route 4 is proposed to be replaced by both a METRO Connect zone, providing better all-day local neighborhood access to transit, and an am/pm peak period express route, offering a fast and direct connection from the Levy/Amboy area to the River Cities Travel Center. While the express route will operate on I-40 and I-30 to reach Downtown, riders can use METRO Connect to make local connections and access a new transit hub at Pershing Blvd & Willow St where there are transfer opportunities with Routes 10 and 13. Service on N. Main St duplicates Route 10, which will continue to operate.
